Re: 532 Florence Avenue  
Bellefontaine, Ohio 43311

Dear Mr. Gray and Mr. Rister,

Hart Environmental Resources has performed a Phase I Environmental Site Assessment in general accordance with the EPA All Appropriate Inquiry (AAI) Rule and ASTM E1527-21 (Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process) on the property listed as 532 Florence Avenue, Bellefontaine, Ohio. Any exceptions to or deletions from this practice are described in Section 2.5 of this report.

No information has been deleted, omitted or changed that would otherwise have caused the user of this report to reach a different conclusion. Hart Environmental Resources realizes that you are depending upon the overall completeness, accuracy and conclusion in this report and hereby certifies that this is a report, which you can rely upon.

Sincerely,

Ralph G. Ranard  
Environmental Inspector

## **1.0 EXECUTIVE SUMMARY**

This Phase I Environmental Site Assessment (ESA) was performed on the property listed as 532 Florence Ave., Bellefontaine, Ohio, for Mr. Tony Coy, with Coy Masonry, LLC and Mr. Gary Rister, with H&H Environmental. The Phase I ESA was conducted in accordance with ASTM E1527-21 (Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process) and the EPA All Appropriate Inquiries Rule. The purpose of this Phase I ESA was to identify any recognized environmental conditions (RECs) associated with the target property using all appropriate inquiries to identify previous owners and uses of the site.

A REC is defined as "the presence or likely presence of any hazardous substances or petroleum products on a site under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the site or into the ground, groundwater, or surface water of the site. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions.

The Phase I Environmental Site Assessment described in the remainder of this document consisted of an inspection of the target property, a review of the history of the site, a review of environmental data sources maintained by Federal, State and Tribal agencies, and of the physical setting of the target property.

This Phase I Environmental Site Assessment has revealed no findings of Recognized Environmental Conditions (RECs) associated with the subject site. No further environmental assessment is needed at this time.

## **2.0 INTRODUCTION**

### **2.1 Purpose**

The assessment was designed to provide an objective, independent, professional opinion of the potential environmental risks, if any, associated with the subject property. The purpose of this environmental assessment was to identify recognized environmental conditions at the subject property. "Recognized environmental conditions" means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions.

The identification of recognized environmental conditions in connection with the subject property may impose an environmental liability on owners or operators of the site, reduce the site's value, or restrict the use or marketability of the site, and therefore, further investigation may be warranted to evaluate the scope and extent of potential environmental liabilities.

### **2.2 Scope of Services**

This assessment was performed in accordance with the scope of services outlined in the American Society for Testing and Materials (ASTM) E 1527-21, Standard Practice for Environmental Site Assessments. There are no exceptions or deletions from the ASTM Practice E 1527-21. Hart Environmental Resources performed the services, for the Phase I Environmental Site Assessment, in a manner consistent with the level of care and skill ordinarily exercised by firms similar to Hart Environmental Resources, which are currently providing similar services. The scope of this assessment includes the following:

- Records Review - Review of records (environmental database, local and state records, historical records, etc.).
- Site Reconnaissance - A visit and inspection of the subject property.
- Interviews - Interviews conducted with present and past owners (if feasible), operators and occupants of the subject property; and with local and/or state government officials.
- Report Preparation - the evaluation of information and the preparation of the report including the findings, conclusions and recommendations, if any, for additional investigation(s). Typically, a Phase I ESA does not include sampling or testing of air, soil, groundwater, surface water, or building materials. These activities would be carried out in a Phase II ESA, if warranted.

### **2.3 Significant Assumptions**

There is a possibility that even with the proper application of these methodologies that there may be conditions that exist on the subject property that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Hart

Environmental Resources believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Hart Environmental Resources cannot and does not warrant or guarantee that the information provided by these sources is accurate or complete. The methodologies of this assessment are not intended to produce all-inclusive or comprehensive results, but rather to provide the User with information relating to the subject property.

#### **2.4 Special Terms and Conditions**

This report was prepared in accordance to ASTM E1527-21 protocol. Performance of the Phase I ESA included a visual inspection of adjacent and nearby properties. It did not, however, include a physical presence onto all the adjacent and nearby sites.

#### **2.5 Limitations and Exceptions of Assessment**

Hart Environmental Resources warrants that the work performed was conducted in accordance with ASTM Designation: E 1527-21 Standard Practice for Environmental Site Assessments, as well as generally accepted standards of competent professionals practicing in the area of environmental site assessments.

This report has been prepared for the exclusive use of the Users, and should not be reproduced or disseminated without the written approval of Hart Environmental Resources and the User. Hart Environmental Resources has retained a copy of this report. No additions or deletions are permitted without the express written consent of Hart Environmental Resources. Use of this report in whole or in part by parties other than the Users is prohibited.

#### **2.6 Data Gaps**

Based on the information obtained during this Phase I ESA, it is the professional opinion of Hart Environmental Resources that historical data failure, as defined in the ASTM guidelines, has occurred in attempting to document the history of the subject property back to earlier of the first developed usage of the property in five-year increments. However, based on the information obtained, the lack of documentation is not deemed critical and did not affect the ability to identify potential REC(s) associated with the subject property. No other data gaps exist.

#### **2.7 Previous Environmental Assessments**

An asbestos survey, dated August 15, 2024, was provided by H&H Environmental, LLC. The survey identified 600 square feet of transite stack cap from the roof of building three (the large warehouse). Their recommendation is to work alongside the demolition contractor to remove the transite material, due to the poor condition of the roof.

#### **2.8 User Reliance**

This report is for the use and benefit of, and may be relied upon by Client and any of its affiliates, and third parties authorized by Client and Hart Environmental Resources, including the lender(s) in connection with a secured financing of the property, and their respective successors and assigns.

### **3.0 SITE DESCRIPTION**

#### **3.1 Location and Legal Description**

The target property is located at 532 Florence Ave., Bellefontaine, Ohio. The subject site consists of three parcels, 17-091-07-13-008-000, 17-091-07-13-009-002, and one parcel which does not have a parcel number. The two numbered parcels have legal descriptions of “0002 35-4-14” and “0004 2146 2147”, respectively.

#### **3.2 Site and Vicinity Characteristics**

Total acreage for the site is 12.001 acres. This area of Bellefontaine is mostly residential, with the target site being the only commercial business in the nearby area. The site has land use code of “499 - Other Commercial Structures” and “400 - Commercial - Vacant Land”. The subject site is basically flat, with a slight gradient to the southwest.

#### **3.3 Structures, Roads, and other Improvements on Site**

There are three structures on the site. The Logan County Auditor’s website does not list the construction dates, or the square footage of the buildings. However, based upon Sanborn Maps, the two brick buildings appear back in 1907. According to Google Map the measurements for the two buildings are estimated to be 3,052 sq. ft. and 8,720 sq. ft. The concrete block building first appears in the 1973 historic aerials, and is estimated to be 1,418 sq. ft. A gravel driveway is found on the property. Access to the site is from Florence Avenue to the west.

#### **3.4 Environmental Liens or Specialized Knowledge or Experience**

No environmental liens or specialized environmental knowledge or experience is known.

#### **3.5 Current Uses of Property**

The property is currently used as a warehouse, to store masonry supplies and equipment.

#### **3.6 Past Uses of Property**

This site has not been recognized in City Directories since 1979, when it was a warehouse for a trucking company. The early use for this site was for New York Central Railway, from the late 1890s to mid-1950s. They used the site as a railway roundhouse and a repair facility for locomotive and boxcars.

#### **3.7 Current Uses of Adjoining Properties**

Florence Avenue dead ends to the west of the property. The site is slightly over 12 acres in size, so there are several adjoining residential homes to the west and south. The adjoining properties to the north and east are heavily wooded areas.

## 4.0 RECORDS REVIEW

A review was made of publicly available records. The following environmental databases were searched within the ASTM mandated search distance from the subject property.

### 4.1 Standard Environmental Record Sources, Federal and State

#### 4.1.1 Target Property

The following records are associated with the target property:

##### 4.1.1.1 OSHA

OSHA's mission is to assure America's workers have safe and healthful working conditions by enforcing compliance to safety infractions.

*In 1974, this site was cited four times for exceeding carbon monoxide thresholds. There are no details of these occurrences, but normally this involves a gasoline or diesel forklift, generator, or other heavy equipment operating inside or outside the warehouse under poor ventilation conditions. These incidents prompted a \$660 company fine. OSHA closed the case files in 1975. This record is not viewed as a REC.*

##### 4.1.2 Surrounding Properties

Environmental databases were searched for properties within the mandated ASTM radius from the subject site. The following records were found for nearby sites.

##### 4.1.2.1 RCRA-TSDF

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA.

Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste. There is one site within approximately 0.5 miles of the target property.

#	Name	Address	Elev.	Dist. (mi)	Direction
1	National Extrusion & Mfg. Co.	200 Orchard Ave.	= or ↑	0.318	E

*The National Extrusion and Manufacturing Co. is not in any EPA databases as an active clean-up site. This site should not impact the target property.*

##### 4.1.2.2 CORRACTS

CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity. There is one site within approximately 1.0 miles of the target property.

#	Name	Address	Elev.	Dist. (mi)	Direction
1	National Extrusion & Mfg. Co.	200 Orchard Ave.	= or ↑	0.318	E

*The National Extrusion and Manufacturing Co. is not in any EPA databases as an active clean-up site. This site should not impact the target property.*

#### 4.1.2.3 LUST-OH

The Leaking Underground Storage Tank Incident Reports contain an inventory of reported actual or possible leaking underground storage tank incidents. The data come from the Department of Commerce Division of State Fire Marshal's List of Reported Petroleum Underground Storage Tank Release Incidents. There are two sites within approximately 0.5 miles of the target property.

#	Name	Address	Elev	Dist. (mi)	Direction	Status <sup>1</sup>
1	Speedway #3430	721 N. Main St.	= or ↑	0.448	E	NFA
2	Sun Oil Co. Inc.	626 N. Main St.		0.452	E	

<sup>1</sup> Status NFA = No Further Action TR1 = Tier 1 Source Investigation DIS = Leak Disproved CLO = Closure

*Both of the above sites have been given a "No Further Action" status from the State Fire Marshal's Office (BUSTR). These two sites are in at a distance that none of these leak incidents should impact the target property. (The EPA is also tracking this information in their EPA LUST database, which is referenced in the Envirosite Government Records Report in appendix 5.)*

#### 4.1.2.4 HIST LF-LD-OH

Database developed from Ohio EPA staff notebooks and other information dating from the mid-1970s. There is one site within approximately 0.5 miles of the target property.

#	Name	Address	Elev.	Dist. (mi)	Direction
1	Chiles Landfill	Township Road 217	= or ↑	0.245	NE

*The above landfill closed in 1987, and there are no records of any RCRA violations. This site should not impact the target property.*

#### 4.1.2.5 Coal Gas

Manufactured gas plant locations. There is one site within approximately 1.0 miles of the target property.

#	Name	Address	Elev.	Dist. (mi)	Direction
1	Bellefontaine Gas Company	409 W. Chillicothe Ave.	↓	0.764	S

*This site has not had any RCRA violations, and should have no impact to the target property.*

#### 4.1.2.6 MGP

Locations of all manufactured gas plants. There is one site within approximately 1.0 miles of the target property.

#	Name	Address	Elev.	Dist. (mi)	Direction
1	Bellefontaine Gas Company	409 W. Chillicothe Ave.	↓	0.764	S

*This site has not had any RCRA violations, and should have no impact to the target property.*

#### 4.1.2.7 DERR-OH

The DERR-OH database is an index of sites for which Ohio EPA maintains files. It includes sites with known or suspected contamination, but a site's inclusion in the database does not mean that it is now or has ever been contaminated. There is one site within approximately 0.5 miles of the target property.

#	Name	Address	Elev.	Dist. (mi)	Direction
1	National Extrusion & Mfg. Co.	200 Orchard Ave.	= or ↑	0.318	E

*The National Extrusion and Manufacturing Co. is not in any EPA databases as an active clean-up site. This site should not impact the target property.*

## 4.2 Physical Setting

### 4.2.1 Topography/Surface Features

The site is basically flat, with a slight gradient to the southwest. The majority of storm runoff would flow in this direction.

### 4.2.2 Soils

According to the web soil survey for the USDA Natural Resources Conservation Service (in appendix 1.7) there are two soil types for this property, which are composed of the following:

Soil Type	%	Description
Miamian-Urban Land Complex, undulating	0.0	Loess over loamy till, well drained ( <i>less than a tenth of one percent of the property</i> )
Udorthents	100.0	Areas of disturbed soils where the upper soil material has been removed, filled or graded, moderately well drained
<b>Total</b>	100.0	

### 4.2.3 Hydrogeology

According to the Logan County Health Department, groundwater flow for the area is in a general southwestern direction. There is no known groundwater contamination in the immediate area. This site is not connected to a municipal water supply. Various Federal, State and Local agencies maintain groundwater well records. Information on these wells is found in the environmental database report, in appendix 5, beginning on page 97.

### 4.2.4 Zoning/Flood Zone

This site is zoned commercial. It is in flood zone X, which is an area of minimal flood hazard. A copy of the FEMA flood map is in Appendix 1.

#### **4.2.5 Radon**

The Ohio EPA files contain 862 readings within the 43311 zip code. The average radon reading for below ground levels is 6.1 pCi/L, which is higher than the EPA regulatory limit of 4.0 pCi/L. None of the structures have a basement.

#### **4.3 Historical Use Information**

The history of the site was developed based on interviews with the Logan County government offices. An examination of historical aerial photographs, Sanborn Maps (if available) and City Directories, for previous occupants, were reviewed.

##### **4.3.1 Aerial Photographs**

1957 – The earliest aerial photograph shows the target site fully developed as a railway roundhouse for New York Central Railway. This includes the maintenance shops to the north and the roundhouse to the south of the property. The surrounding adjoining properties to the west and south are residential homes. To the north are rail tracks, while a wooded area is to the east.

1973, 1981, 1988 – The target property and adjacent properties appear unchanged.

1994 – Most of the buildings have been demolished, with the exception of the three current structures that exist today. The railroad tracks have also been removed to the north of the property, with this area becoming wooded. The remaining adjoining properties appear unchanged.

2000, 2004, 2006 - The target property and adjacent properties appear unchanged.

2011 - The target property and adjacent properties appear unchanged. The southeast side of the target property, though, is being used as concrete debris storage.

2016, 2021 – The target property and adjacent sites are like those of today.

##### **4.3.2 Sanborn Maps**

There are four Sanborn Maps found from 1907, 1914, 1926, and 1949.

1907 – The earliest Sanborn Map shows a roundhouse, on the south side of the property, as well as buildings, to the north. The building directly to the north of the roundhouse is a boiler shop, with two water tanks located to the southwest side of this building. Further north are three machine shops, a carpenter shop, and a forge shop. The adjoining property to the north is various rail lines. The east is not depicted on this map, but believed to be wooded areas from later aerial photographs. To the west are residential homes, A YMCA, followed by residential homes, is to the south.

1914 – The target and adjoining sites are similar to the 1907 map with the following changes: The railway roundhouse has expanded to approximately twice the size. Two water softener tanks have been built near the two existing water tanks. Three water wells are now shown on the west side of the water tanks.

1926 – The target property is unchanged. The YMCA to the south has been replaced with a dwelling.

1949 – The size of the railway roundhouse has expanded. Above ground oil tanks are now to the northwest of the roundhouse. *(It should be noted that these former oil tanks would today have been on the adjoining residential property to the west.)* The former YMCA turned into a dwelling, is now depicted as a locker house. A former adjoining dwelling at the intersection of Cook Ave. and Lawrence St. is now a store, and appears to have three underground storage tanks.

### **4.3.3 City Directories**

City directories were reviewed for occupants of the target property from 1959-2018.

<u>Year</u>	<u>Occupant</u>
1959, 1962, 1968	Not Listed
1974	City Warehouse Inc.
1979	City Warehouse Inc. / U.S. Truck Co. Inc.
1984, 1989	Vacant
1994, 1999, 2004, 2008, 2013, 2018	Not Listed

### **4.3.4 City Directories for Adjoining Properties**

The adjoining properties to the north and east are wooded areas. All the adjoining properties from 1959-2018, to the south and west, are residential homes.

### **4.3.5 Historical Topographic Maps**

Historic topographic maps provide information related to physical land configuration such as elevation, ground slope, surface water and other features. While most buildings in densely developed urban center are not depicted, topographic maps typically show structures equal to or larger than the size of a single-family residence in rural areas. Other notable features such as woods, pipelines, and municipal boundaries are often marked on topographic maps.

The National Geologic Map Database was off-line and no information could be retrieved.

### **4.3.6 Ownership History**

The Logan County Recorder’s website does not contain images that would allow a user to research prior recorded deeds. The below information is from the Logan County Auditor’s website.

Date	Previous Owner	Current Owner
<i>Parcel 17-091-07-13-008-000</i>		
22 May 07	Ziessler John J	Ziessler John J & Doris A
28 Mar 08	Ziessler John J & Doris A	Coy Tony L & Barbara J
<i>Parcel 17-091-07-13-009-002</i>		
This parcel has no sales history		

## **5.0 INFORMATION FROM SITE RECONNAISSANCE**

The site reconnaissance was performed on October 14, 2024, by Ralph Ranard. The subject site is located at 532 Florence Avenue, Bellefontaine, Ohio. The facility is currently used for masonry supplies and equipment storage.

### **5.1 Hazardous Substance and/or Petroleum Products with Identified Uses**

None was observed.

### **5.2 Hazardous, Petroleum and/or Unidentified Substance in Unidentified Containers**

None was observed.

### **5.3 Storage Tanks**

No above ground or underground storage tanks, or vent pipes, to indicate the presence of USTs, were observed.

### **5.4 Indication of PCBs**

No PCB containing items were observed.

### **5.5 Indications of Solid Waste Disposal or Hazardous Substance/Petroleum Releases**

There were no signs of solid waste disposal or hazardous substance/petroleum release.

### **5.6 Structures**

Three structures are on the property. Two date from the late 1800s or early 1900s, and one from the mid-1970s.

### **5.7 Drains and Sumps**

One suspected storm drain was observed where the roundhouse was once located. No sumps were observed.

### **5.8 Utilities**

The structure has electric only. It is not connected to city water or sewage. No septic systems or cesspools are present on the property.

### **5.9 Waste Water**

No waste water is being generated.

### **5.10 Wells**

No monitoring or drinking wells were observed.

### **5.11 Pits, Ponds, Lagoons**

No standing surface water or pools containing liquids likely to be hazardous substances or petroleum products were observed.

### **5.12 Stained Soil/Distressed Vegetation**

No distressed vegetation, stained soil or stained pavement was observed.

### **5.13 Odors**

No odors were detected indicative of potential RECs at the site.

### **5.14 Drums**

None were observed.

### **5.15 Vapor Intrusion**

Vapor intrusion involves the potential for chemicals in soil or groundwater to volatilize, enter buildings and create indoor air quality concerns. The site was used as a locomotive and boxcar repair facility from the 1890s to the mid-1950s. However, no physical evidence from the site investigation, or government records, exists that suggest any contamination from volatile solvents. Therefore, vapor intrusion is not viewed as an issue.

### ***Non-ASTM Items***

### **5.16 Asbestos**

Asbestos was identified in the Asbestos Survey Report, dated August 15, 2024 (See appendix 7).

### **5.17 Lead-based Paint**

As the structure was built in late 1800s, or early 1900s, lead-based paint may be present.

### **5.18 Lead Solder**

None was observed.

### **5.19 Microbial Contamination (Mold)**

No obvious, significant visual and olfactory presence of mold were noted in the facility.

### **5.20 Wetlands**

There are no wetlands, or vegetation associated with wetlands, on the property.

## **6.0 INFORMATION FROM INTERVIEWS**

### **6.1 Property Owner**

Mr. Tony Coy, the current property owner, provided input for this report and he also assisted with the on-site walkthrough. He stated they have operated from this site since 2008, as a masonry storage facility. Two of the three buildings are in poor condition and need to be demolished. As part of the demolition process, Mr. Coy requested an asbestos survey in August 2024. The survey investigation determined that asbestos was present in the roof stacks. Mr. Coy then requested this Phase I report to submit for a Brownfield grant to remove the asbestos. Mr. Coy does not have any other environmental concerns with this property.

### **6.2 Logan County Health Department**

According to the Logan County Health Department, there are no known drinking water problems with adjacent properties. The subject site is not connected to a municipal drinking water supply.

### **6.3 Fire Department**

The Bellefontaine Fire Department was contacted for a review of their records for the site. The focus of the inquiry was for tanks, spills, fires, or hazmat incidents at the site. The focus excluded medical runs or false fire alarms. Fire Fighter Hager Hodge stated no records were found.

### **6.4 Logan County Emergency Management Office**

The Emergency Management Office for Logan County was contacted for a review of their records for the site. None were found.

### **6.5 Ohio EPA Southwest District Office**

The Ohio EPA Southwest District Office was contacted for a review of their records. They did not have any additional information on this site. A further review of the Ohio eDocuments database did not turn-up any additional documents.

## **7.0 FINDINGS & OPINIONS**

The target property contains three buildings, two of which were built over 100 years ago, and the third in the mid-1970's. Only the 1970's building is being utilized as a storage garage. The other two buildings are in poor condition, with plans scheduled for demolition. As part of the demolition process, an asbestos survey was performed, which identified asbestos in the roof caps. This Phase I Environmental Site Assessment is in support of obtaining a Brownfield grant.

No hazardous waste is used or generated on the subject site. No above ground or underground storage tanks were observed on the property. There are no records of any storage tanks existing at the site.

There were no signs of oil spillage, distressed vegetation or stained soil. The inside of the building was clean, without signs of any leaks or spills. The Logan County Health Department knows of no contamination of the groundwater supply in the immediate area. The site is not connected to a municipal water or sanitary supply. The site is in a minimal hazard flood zone. It does not contain wetlands.

The subject site has one record associated with activities conducted at the facility. This record is an OSHA record from 1974 that indicated the site had elevated levels of carbon monoxide. The details are lacking, but OSHA cleared this record in 1975. This is not viewed as a Recognized Environmental Condition.

There are several nearby sites with environmental records. None, though, should have an impact on the subject property.

## **8.0 CONCLUSIONS**

Hart Environmental Resources has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the property located at 532 Florence Avenue, Bellefontaine, Ohio. Any exceptions to or deletions from this practice are described in Section 2.5 of this report.

This assessment has revealed the evidence of no Recognized Environmental Conditions (RECs) in connection with the subject property. No further actions are required at this time.

### MAP PANELS

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 10/16/2024 at 6:26 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmoderated areas cannot be used for regulatory purposes.

## MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

**Warning:** Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service  
 Web Soil Survey URL:  
 Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Logan County, Ohio  
 Survey Area Data: Version 22, Aug 28, 2024

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: May 21, 2023—Aug 8, 2023

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

## Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI

# Picture Orientation Appendix 3.1

 On/Towards Property

 Away from Property

**1** 532 Florence Avenue, Bellfontaine, Ohio is the former site of a New York Central Railroad switching station, and is currently used as a storage site for a masonry business. The northern side of the first building near the entrance of the site.

**2** The brick and concrete block buildings on the site did not have construction dates according to the Logan County Auditor, but do appear in a 1907 Sanborn Map. The western side of the first building.

3 The first building is partially collapsed, and no hazardous materials were observed.

4 The second building on the site is used for personal storage. The western side of the building.

- 5 Small amounts of gasoline, oil and grease were observed in the second building, along with other stored personal items. No environmental concerns were observed in this building.

- 6 The third building was the former repair facility for the locomotive engines and railcars. The building was then used as a warehouse, but now sits vacant. The northern side of the building.

7 Inside the third building facing east.

8 Inside the third building facing west.

- 9 An outdoor storage area to the north of the third building. Several totes and poly drums were observed. These items were used by the masonry company and only ever contained water. They currently are empty.

- 10 An overgrown area to the north of the outdoor storage area. Under the leaves are concrete remnants of a former maintenance building.

**11** A second large outdoor storage area for concrete blocks and other masonry items. This area is to the east of the third building.

**12** To the southeast of the third building is a pile of concrete that has been removed from other demo projects. This area is also where the former New York Central Roundhouse was located.

**13** To the south of the concrete pile is a trail that leads off the site.

**14** The adjoining property to the south is residential, with a large workshop.

**15** The adjoining property to the east and north is a wooded area.

**16** The adjoining properties to the west, and to the north of Florance Avenue, are residential homes.

**17** The adjoining properties to the west, and to the south of Florance Avenue, are also residential homes.

**Source Description**

**Source Description :**

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

**Source Description :**

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

### Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Water Wells

## FLOOD Q3

Flood data

Environmental Protection Agency

(202) 566-1667

Q3 Flood Data

## HYDROLOGIC UNIT

Hydrologic Unit Maps

USGS

The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

## WETLANDS NWI

National Wetland Inventory

U.S. Fish and Wildlife Service

USGS Digital Data Series DDS: Geologic Age and Rock Stratigraphic Unit

## OIL & GAS WELLS - OH

Oil and Gas Well Data

Division of Oil & Gas Resources

614.265.6923

Oil and gas well locations and detail for all 6 districts

## RADON

National Radon Database

U.S. Environmental Protection Agency

215-814-2469

A study of the EPA/State Residential Radon Survey and the National Residential Radon Survey.

## RADON EPA

RADON EPA

U.S. Environmental Protection Agency

215-814-2469

EPA list of Radon zones

## AIRPORT FACILITIES

Airport landing facilities

Federal Aviation Administration

(866) 835-5322

Airport landing facilities

## BASINS

Better Assessment Science Integrating point & Non-point Sources

U.S. Environmental Protection Agency

855-246-3642

Integrated geographical information system national watershed data and environmental assessment known as Better Assessment Science Integrating point & Non-point Sources

## DIGITAL OBSTACLE

Obstacles of interest to aviation users

Federal Aviation Administration

855-379-6518

The Digital Obstacle File describes all known obstacles of interest to aviation users in the U.S. with limited coverage of the Pacific the Caribbean Canada and Mexico. The obstacles are assigned unique numerical identifiers; accuracy codes and listed in order of ascending latitude within each state or area by FAA Region.

## EPICENTERS

National Geographical Data Center

National Geographical Data Center

303-497-6826

List of recent and historic earthquakes and information.

## FLOOD DFIRM

National Flood Hazard Layer Database

Federal Emergency Management Agency

The National Flood Hazard Layer Database (NFHL) is a computer database that contains the flood hazard map information from FEMA's Flood Map Modernization program. These map data are from Digital Flood Insurance Rate Map (DFIRM) databases and Letters of Map Revision.

Environmental Inspector: <u>Ralph Ranard</u> Date: <u>14-Oct-24</u>	

### Part A (Questions to Client)

Need by Date: 18 Oct 24

1. Which fire department supports this location? Comments: <u>Bellefontaine FD</u>
2. Has fill dirt been brought onto the property from a contaminated site or that is of an unknown origin? Observed: Yes <u>_____</u> No <u>X</u> Unk <u>_____</u> Comments: _____
3. Are there currently, or have there previously been, any storage tanks (above or underground) on the property? Observed: Yes <u>_____</u> No <u>X</u> Unk <u>_____</u> Comments: _____
4. Is there any reason to suspect Radon may be a problem, or has the structure been tested for Radon? Observed: Yes <u>_____</u> No <u>X</u> Unk <u>_____</u> Comments: _____
5. Is a private well the primary or sole source of drinking water for the property? Observed: Yes <u>_____</u> No <u>X</u> Unk <u>_____</u> Comments: <u>There are no active wells or public water on-site</u>
6. If the property has a private well or non-public water system, have contaminants been identified in the well or system that exceed guidelines applicable to the water system or has the well been designated as contaminated by any government environmental/health agency? Observed: Yes <u>_____</u> No <u>X</u> Unk <u>_____</u> Comments: _____
7. Does the property owner or occupant have any knowledge of environmental liens or governmental notification relating to past or recurrent violations of environmental laws with respect to the property? Observed: Yes <u>_____</u> No <u>X</u> Unk <u>_____</u> Comments: _____
8. Has the owner or occupant of the property been informed of the past or current existence of hazardous substances or petroleum products or environmental violations with respect to the property? Observed: Yes <u>_____</u> No <u>X</u> Unk <u>_____</u> Comments: _____
9. Does the owner or occupant of the property have any knowledge of any environmental site assessment of the property that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property? Observed: Yes <u>_____</u> No <u>X</u> Unk <u>_____</u> Comments: _____
10. Does the owner or occupant of the property know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products on the property by any owner or occupant of the property? Observed: Yes <u>_____</u> No <u>X</u> Unk <u>_____</u> Comments: _____

## Part B (Site Observations)

11. Is the property or any adjoining property being used as an industrial site or does the property or any adjoining property appear to have been used as an industrial site in the past?	Observed: Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk <input type="checkbox"/>
Comments:	The site was used as a railroad yard over 50 yrs ago, which included repairs and maintenance
12. Is the subject site or any adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?	Observed: Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unk <input type="checkbox"/>
Comments:	
13. Are there currently, or does there appear to have been, any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers greater than 5 gallons (19 L) in volume or 50 gallons (190 L) in the aggregate, stored on or used at the site?	Observed: Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unk <input type="checkbox"/>
Comments:	
14. Are there currently, or does there appear to have been previously, any industrial drums (typically 55 gallon) or sacks of chemicals located on the property?	Observed: Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unk <input type="checkbox"/>
Comments:	
15. Are there currently, or indications to have been, any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal or an oily sheen observed on any water on the site?	Observed: Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unk <input type="checkbox"/>
Comments:	
16. Is there currently any stained soil or evidence of damaged vegetation on the property?	Observed: Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unk <input type="checkbox"/>
Comments:	
17. Are there currently any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	Observed: Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unk <input type="checkbox"/>
Comments:	
18. Are there any signs of pesticide or herbicide use or is the property used for agricultural purposes?	Observed: Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unk <input type="checkbox"/>
Comments:	
19. Are there currently, or indications that there have been, any flooring drains, or walls located within the structure that are stained by substances other than water or are emitting foul odors?	Observed: Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unk <input type="checkbox"/>
Comments:	
20. Are there any signs of asbestos such as pipe insulation or floor tile, or was structure built before 1979?	Observed: Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk <input type="checkbox"/>
Comments:	An asbestos report dated 15 Aug 24 found asbestos
21. Are there any signs of UREA Formaldehyde Foam Insulation (UFFI) in the structure?	Observed: Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unk <input type="checkbox"/>
Comments:	
22. Is there any evidence of lead paint or peeling, cracking, or flaking paint observed in the structure?	Observed: Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unk <input type="checkbox"/>
Comments:	
23. Is there any evidence of lead pipes or lead soldered pipes on the property?	Observed: Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unk <input type="checkbox"/>
Comments:	
24. Does the property discharge waste water on or adjacent to the property other than storm water into a sanitary sewer system?	Observed: Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unk <input type="checkbox"/>
Comments:	There is no water discharge on-site
25. Does there appear to have been any hazardous substances or petroleum products, unidentified waste materials, tires, batteries or any other waste materials dumped, buried or burned on the property?	Observed: Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unk <input type="checkbox"/>
Comments:	
26. Is there a transformer, capacitor, or any hydraulic equipment which there are any records indicating the presence of PCB's?	Observed: Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Unk <input type="checkbox"/>

### Part C (Tanks)

27. Any tanks on the property?

Observed: Yes  No  Unk

Comments: \_\_\_\_\_

28. Is this site a gas station?

Observed: Yes  No  Unk

Comments: \_\_\_\_\_

29. If this site is a gas station, are the tanks monitored electronically?

Observed: Yes  No  N/A

Comments: \_\_\_\_\_

Tony Coy

Asbestos survey: 532 Florence Ave. Bellefontaine, OH 43311 (Larger Building)

Tony,

H&H Environmental, LLC. has completed an inspection for asbestos-containing materials (ACM) at 532 Florence Ave. Bellefontaine, OH 43311. This inspection was performed by Tyler Rister (Certification # 35958) and Jace Hurt (Certification # 36450) on August 11<sup>th</sup>, 2023 in Bellefontaine, OH. Tyler Rister and Jace Hurt maintain a current Ohio EPA Asbestos Inspector Certifications. Proof of these certifications are attached.

Enclosed:

1. Asbestos Survey Cover
2. Asbestos Survey Letter
3. Purpose and Procedure
4. ACM Summary and Notice
5. Sample Chain-of-custody
6. Sample Site Pictures
7. Laboratory Analysis Report (and point-count analysis if applicable)
8. Asbestos Inspector Certifications

**Purpose of Inspection:**

The ACM inspection was conducted in accordance and observation of EPA NESHAP and OSHA regulations pertaining to the demolition/renovation of regulated structures. This inspection included all applicable and accessible areas of the structure.

**Procedure:**

The inspection, conducted on 08-11-23, was completed utilizing applicable Federal and Ohio State regulations pertaining to asbestos: Federal OSHA (29 CFR 1910.1001 and 29 CFR 1926.1101), EPA (40 CFR Part 61), and TSCA Title II AHERA/ASHARA (40 CFR Part 763) Asbestos Regulations. The findings in this report are consistent with accepted principles and practice established and prescribed by the EPA and AHERA.

All accessible areas of the building in Bellefontaine, OH were inspected physically, functional space by functional space, and homogeneous area by homogeneous area to determine the presence of asbestos-containing materials. Suspected asbestos-containing materials were grouped per homogeneous area. Suspect materials that may be present inside wall cavities, electrical wiring or which were otherwise inaccessible were not included in the scope of this inspection. Core samples of friable and non-friable suspect asbestos-containing materials were collected to be analyzed for asbestos content. Those materials considered to be non-suspect (concrete, wood, fiberglass, carpeting, metal, etc.) were not sampled for analysis. Each location for sample collection, chosen at random, were representative of the suspect materials. The bulk samples were placed in zip-lock bags, sealed, and labeled with an identifying code. The samples, along with the chain-of-custody, were then submitted to the laboratory, McCall and Spero Environmental, Inc., to be analyzed for asbestos content. A copy of the chain-of-custody is attached.

5 bulk samples of suspected ACM, were submitted to a laboratory for analysis using Polarized Light Microscopy. Laboratory results are attached.

**Analytical Results:**

<b>H&amp;H Sample # Lab Sample #</b>	<b>Homogenous Area</b>	<b>Layers</b>	<b>Description/ Sample Location</b>	<b>PLM Result</b>
B-01 P8143HHE-01	1	1	Transite Roof stack/cap debris near Walls A/B	15% Chrysotile 10% Crocidolite
B-02 P8143HHE-02	2	1	Masonry Roof Decking debris near Wall B/C	ND
B-03 P8143HHE-03	2	1	Masonry Roof Decking debris near Wall B	ND
B-04 P8143HHE-04	3	1	Asphalt Roofing debris near Wall B	ND
B-05 P8143HHE-05	3	1	Asphalt Roofing debris near Wall B/C	ND

**Summary:**

Based the analysis of suspected ACM samples, a number of the samples of homogenous areas were determined to be asbestos-containing.

The approximate total of asbestos-containing materials are as follows:

**Transite Stack/Caps (12 Total, 50Sq.ft. each)**

**600 Sq.ft.**

**\* H&H Environmental recommends removing Transite stack/caps with the assistance of the demolition contractor during demolition as roof is in very poor shape.**

Among the material noted above, **Transite Stack/Cap** material must be removed by a licensed asbestos abatement contractor prior to demolition or renovation if it would impact this material.

Under current Ohio standards materials containing less than 1% are not “asbestos containing material”. However, this material is still regulated under OSHA and must adhere to wet handling, prompt cleanup, disposal requirements set forth by 29 CFR 1926 as applies to demolition operations involving materials containing less than 1% asbestos.

**Notice:**

An Ohio EPA Notification of Demolition and Renovation form must be completed and submitted to the Ohio EPA at least ten working days prior to the commencement of any abatement or demolition activity. The amount, type and condition of the asbestos-containing materials found in this inspection, as well as the materials assumed to be asbestos-containing materials, must be noted on the form. The name and certification number of the asbestos inspector must be included.

If any additional materials are encountered in these locations, these materials should be left intact and undisturbed until they can be inspected and and sampled by a licensed Asbestos Abatement Evaluation Specialist. H&H Environmental would be happy to return to the site if additional suspect materials are encountered during demolition activity. The other option is to assume that the material is asbestos-containing and have it abated as such.

This report, and the supporting findings, data, conclusions, and recommendations represents H&H Environmental's efforts on behalf of the client. This report is not an asbestos abatement specification and shouldn't be used for specifying removal techniques or methods. The assessments, conclusions, results, and recommendations stated in this report are representative of the circumstances and conditions observed by the inspector at the date of the inspection. We cannot assume responsibility for any change in conditions or circumstances that occurred after inspection. The findings in this report, if implemented by the client, should not be construed as as an assurance or implied warranty for the continuing safety, performance, or cost-effectiveness of any equipment, system, product, procedure, facility, or policy recommended or discussed herein.

The recommendations in this report are based on the professional judgment of the inspector and the results of the samples collected an analyzed. H&H Environmental makes no warranty, expressed or implied, and accepts no liability for the presence or absence of asbestos or other hazardous materials in or on home products, materials, and areas. H&H Environmental assumes no responsibility for the cost of repairing, removing, or replacing any undiscovered or unreported condition or defect, or any future condition or defect.

If you have any questions or concerns please feel free to contact H&H Environmental's Charles E. Hurt at 419-618-3072.

Thank you,

Tyler Rister

Subject: Analysis of bulk samples for asbestos mineral fibers by Polarized Light  
Microscopy (PLM) with Dispersion Staining (EPA/600/R-93/116)

RE: MSE-P8143HHE  
532 Florence Ave; Bellefontaine, OH 43311 Project

Dear Mr. Hurt:

McCall & Spero Environmental, Inc. has completed the analysis of the bulk samples we received from your offices on August 14, 2023. These samples represent the bulk samples from the 532 Florence Ave; Bellefontaine, OH 43311 Project.

The PLM bulk analysis was performed according to the "Method of the Determination of Asbestos in Bulk Building Materials", R. L. Perkins and B. W. Harvey (EPA/600/R-93/116).

The results for the five (5) samples are summarized in the following report. Please note that for samples consisting of two or more distinct components, each component is analyzed and reported individually (EPA 40 CFR Part 61 [FRL-4821-71]).

Thank you for consulting McCall & Spero Environmental, Inc. Should you have any questions concerning these results, please contact our office.

Sincerely,

Kevin R. Bean, B.A.  
PLM Laboratory Director

# SUMMARY OF PLM BULK ANALYSIS RESULTS

Page 1

Project Name: 532 Florence Ave; Bellefontaine, OH 43311 Project  
McCall & Spero Environmental Project No. MSE-P8143HHE

MSE # P8143HHE	SAMPLE # DESCRIPTION	ASBESTOS TYPE & %	OTHER FIBROUS MATERIAL & %	% NON-FIBROUS MATERIAL	COLOR
001	B-01 Transite Roof Stock/Cap	CH / 15% CR / 10%	ND	75%	Gray
002	B-02 Masonry Roof Decking	ND**	Cellulose / 2% Hair / 2%	96%	Gray
003	B-03 Masonry Roof Decking	ND**	Cellulose / 2% Hair / 2%	96%	Gray
004	B-04 Asphalt Roof Sheeting	ND**	Cellulose / 25%	75%	Black
005	B-05 Asphalt Roof Sheeting	ND**	Cellulose / 25%	75%	Black

## NOTES:

ND = None Detected      CH = Chrysotile      A = Amosite      AC = Actinolite  
CR = Crocidolite      AN = Anthophyllite      TR = Tremolite

For samples consisting of separate components, each component is analyzed and reported separately.

Results apply only to items tested. Quantification is accurate to within  $\pm 10\%$ . Results from this report must not be reproduced, except in full, with the approval of McCall & Spero Environmental, Inc. This report must not be used to claim product endorsement by NVLAP or any agency of the U.S. Government.

\*\* EPA recommends that bulk materials found negative for asbestos or less than one percent asbestos by polarized light microscopy that fall into one of five dominantly nonfriable categories be reanalyzed by an additional method, such as transmission electron microscopy. (EPA Notice of Advisory, FR Vol. 59, No. 146 & Test Method EPA 600/ R-93/ 116).

Analyst: Kevin R. Bean, B.A.
